Mandarin

## ABOUT ME:

An enthusiastic, hardworking, analytical-minded professional seeking an opportunity for the next step in his career as a Junior Front End Developer.

Aaron is focused, resilient and gives 100% effort to any task or project to ensure a successful outcome. He prides himself on his communication skills and his ability to adapt quickly to change, as well as his aptitude for picking up new skills.

He works well both in a team and on his own accord. Aaron thrives under pressure and is able to adhere to strict deadlines whilst also maintaining an excellent level of organisation and timekeeping.

## EDUCATION:

### • Front End Development & UX Bootcamp : University of Birmingham

- Grade - 100% **Attained**
- Nov 2023 - Mar 2024

A 16-week intensive program sponsored by the Department of Education focused on learning the technical front-end fundamentals of web development, including HTML5, CSS, JavaScript, Git, and GitHub.

Learning how to utilise JavaScript frameworks to leverage and manipulate data via application programming interfaces (APIs).

Develop a portfolio of web applications and showcase your relevant front-end skills with popular, market-driven libraries like React.js.

### • BSc (Hons) Transportation: Ulster University

- Grade - 2:1 **Attained**
- 2013 - 2017

A 4 year degree course where Aaron gained a comprehensive understanding of transportation systems, covering planning, logistics, infrastructure management, and sustainability.

The program combined theoretical knowledge with practical application, emphasising sustainability and innovation. The degree equipped Aaron with the competence to contribute to the ever-evolving global landscape of transportation systems.

## WORK EXPERIENCE:

### • DevOps Intern - Lumar Jan 2024 - Present

- Worked on Lumar's security AI chatbot UX/UI design.
- Developed the prompts so that the bot responds better to user queries.
- Personal development tasks such as learning more about the tools we utilise such as; Docker, Kubernetes, AWS, Prometheus.
- Handling some tickets from the DevOps team's Kanban board.
- Review tech expenditure with the DevOps team during refinement meetings.

### • Partner - Zensho Agency Jul 2023 - Jan 2024

### • Senior Account Executive - First point Group Oct 2021 - Jun 2023

### • Senior Fleet Coordinator - Brakes Foodservice Feb 2020 - Oct 2021

### • Senior Transport Ops Clerk - Booker Retail Partners Nov 2018 - Feb 2020

### • Transport Administrator - Knights of Old Nov 2017 - Aug 2018
